Belfast Rapid Transit Consultation

Thank you for the opportunity to comment on the Belfast Rapid Transit Consultation.

Roads Service has statutory duties in relation to the management and maintenance of the road network in Northern Ireland. As such, it is important that any enabling power taken by DRD for the provision of Rapid Transit does not conflict with any statutory “roads” powers that DRD already has.

Also, in exercising any future statutory functions, it is important that agreement is reached with Roads Service on the detailed plans and proposals for a Rapid Transit System, to ensure the safe and efficient operation of the road network.
